

This code is a web application that uses Node.js, MongoDB and ExpressJS. It shows the basic structures which includes a database, models and controllers. The primary purpose of this code is to create an application that allows users to enter information about NBA Players with there names, heights, and positions they play. This also uses EJS view for a user friendly experience. This code serves as an example illustrating how to create a simple CRUD application using Node.js, Express, and MongoDB.
